for the
love
of horses

Energy-Power-Liquid

Special features of Energy-Power-Liquid:

- ✓ High quality and available source of energy made of valuable vegetable oils
- ✓ Rich in polyunsaturated fatty acids which can have a positive effect on the entire metabolism, immune system, digestion and muscles
- ✓ With fennel oil, cumin oil and aniseed oil for a harmonic digestion
- ✓ Can even out the balance of energy to protein in a ration with a high amount of concentrates
- ✓ Rich in polyunsaturated fatty acids which can have a positive effect on sensitive skin and can improve the overall appearance of the skin
- ✓ Can improve endurance

Improves the horses stamina and supports the immune system, digestion, cell metabolism, muscles, skin and coat with essential fatty acids

Ideally suited:

- ✓ *To improve the energy supply with a positive effect on the entire vitality*

Vegetable oils deliver pure energy that are used to improve the energy content of sport- and leisure horse's rations and to reduce the amount of concentrates (starch) when sensitivities exist. Also adding oil increases the density of the ration which can be a very useful diet-related compensation for rations high in concentrates. When feeding oils as an energy source, vegetable oils with a high amount of the polyunsaturated fatty acids linoleic and linolenic (better known as omega-3 and omega-6 acids) can be especially useful. A high amount of omega-3 fatty acids can promote the body's production of anti-inflammatory tissue hormones which can have a positive effect on the vitality.

In LEXA Energy-Power-Liquid we combine a high

amount of linseed oil with the natural vegetable oils sunflower oil, safflower oil and maize germ oil. Energy-Power-Liquid is enriched with perilla oil which is known for its high content of omega-3 fatty acids. To support the sensitive intestinal-system LEXA Energy-Power-Liquid additionally contains fennel oil, cumin oil and aniseed oil. Thus LEXA Energy-Power-Liquid distinguishes itself as a highly effective combination of vegetable oils for a highly available energy source which doesn't only improve the stamina but also provides valuable omega-3 fatty acids.

Feeding recommendations:

According to demand 50 to 150 ml per large horse (600kg)

Components

Linseed oil, sunflower oil, safflower oil, maize germ oil, perilla oil, wheat germ oil, fennel oil, aniseed oil, cumin oil

Analytical components

Crude oil and fat	100 %
